

PLENTICORE plus remains in the programme

+ Battery activation code permanently reduced

Valid from
03.06.2024

And what do you have to do? **Nothing!** KOSTAL is **permanently reducing the number of PLENTICOINs** required to retrieve the battery activation code from 3 to 1 PLENTICOIN. KOSTAL will book an additional 1 PLENTICOIN into your KOSTAL Solar Webshop company account for each battery activation code until 30.09.2024 (Promotion „Strong Start“). This means that the **battery activation code for the PLENTICORE plus (G1/G2) is free during the promotional period.**

Permanently reduced!

PLENTICOIN in the value of over 100€ saved!

Permanently reduced!

PLENTICOIN in the value of over 100€ saved!

1 x PLENTICOIN as a gift until 30.09.2024

PLENTICOIN in the worth over €100 as a gift (Promotion „Strong Start“)!

Tip: If the KOSTAL Energy Meter (KEM) is included in the installation, installers save a further price advantage of over €100.

Promotion „Strong Start“: For each battery activation code, 1 PLENTICOIN is added to your company account in the KOSTAL Solar Webshop.

- Participation is automatic, no registration required
- PLENTICOINs are booked in mid-June, mid-August and mid-October

Fair and transparent: the KOSTAL activation code

“Only to pay for what you need and when you need it” - that’s what makes the KOSTAL activation code fair and transparent. With the battery activation code, PLENTICORE plus becomes a hybrid inverter. Compatible with a large number of well-known storage partners, the planning of solar systems with a battery becomes as flexible as possible.

Good reasons to choose a KOSTAL inverter. Made in Germany.

The PLENTICORE plus is KOSTAL’s successful inverter series and will remain in the programme. With its excellent price/performance ratio, the PLENTICORE plus will be continued in parallel.

KOSTAL scores with high quality and modern safety standards - this is what makes the inverters so popular.
